

Environmental Compliance Audit

EP Risk Management was engaged to undertake an Environmental Compliance Audit for a national transport company with a large portfolio of bus depot facilities in SA, WA and QLD. The Audit was commissioned for due diligence purposes.

Services Provided

- Review previous baseline environmental audits undertaken on the government owned sites prior to occupation by our client.
- Review of our client’s Environmental Management System, relevant procedures or other related documentation to ensure that operations are compliant with the relevant environmental legislation.
- Review of environmental contractual obligations for the government owned sites that are currently leased by our client.
- Undertake an inspection of each site including an interview with site staff, site photos and identification of potentially contaminating activities.
- Preparation of an audit report that details all the findings of each site audit and includes the risk matrix and recommendations to address any compliance issues identified.

Project Title:
Environmental Compliance Audit

Client:
National Transport Company

Category:
Due Diligence Assessment

Location:
SA, WA and QLD

Project Outcome

EP Risk identified a number of action items, which when adopted further improved the environmental performance of each site.
