

Landfill Monitoring Design and Field Services

The Benalla Landfill is situated just outside the rural town of Benalla in Victoria, approximately 200 km northeast of Melbourne. The Benalla Rural City Council (BRCC), who manage the landfill require a range of ongoing monitoring to satisfy both EPA, Environmental Audit and day to day operational requirements.

Services Provided

The following services are provided to BRCC for the landfill by EP Risk Management:

- Quarterly groundwater, leachate, surface water and landfill gas monitoring.
- Comprehensive hydrogeological assessment.
- Leachate sump installations (retrofit to legacy cells).
- Groundwater monitoring well network installation.
- Landfill gas bore network installation.
- General landfill specific consulting services.

Project Outcome

Ongoing reporting to assist BRCC with their landfill environmental management requirements and operational obligations.

Client

Benalla Rural City Council

Scope

Landfill monitoring services
Landfill consulting services
Infrastructure design and installation

Location

Benalla Landfill

Year(s)

2016 to current
